

PIKKI

The main foundation of the formation of PIKKI began with the wishes of the President of the Republic of Indonesia as stated in his inauguration speech

"We must work as hard as we can to restore Indonesia as a maritime country. Ocean, sea, strait and bay are the future of our civilization. We have been backing the sea too long, backing the ocean, backing the strait and the bay. "

In connection with the wishes of the President of the Republic of Indonesia, the Director General of High Technology-Based Leading Industries (IUBTT) of the Ministry of Industry

Budi Darmadi said that "Indonesia ideally has 200 units of ship component industry, currently only 100 units are available, so it still needs 100 more units with an investment of Rp. 50-100 billion per unit to meet economies of scale. The production capacity is ideally around 10 components for each type per month "

Indonesia needs to build a ship component industry so that the shipyard industry is also more independent and can reduce imports of ship components. Moreover, 100 shipyard component industries currently operating in the country are not pure component industries.

The industry is still integrated with the shipyard industry. Gradually, all ship component production work that has been held by the shipyard industry must be transferred entirely to the pure component industry.

Furthermore, the main shipyard industry in the country will be more encouraged to produce new vessels or run repairs.

The Ministry of Industry will continue to encourage the development of domestic ship component industries. This step is needed as a strategy to spur industrialization of national shipyards. Therefore steps and policies will be focused on efforts to create markets to be able to repeat orders, so the industry is also efficient.

Furthermore, the Director of the maritime industry, Aerospace and Defense, Directorate General of Metal, machinery Industry transportation equipment and Electronic Components Industry Association initiated the formation of Indonesia Vessel abbreviated PIKKI for hosts the producers of domestic ship components to take a role in realizing the Government's program in the shipping industry at once makes the domestic ship's components industry grew stronger, self-sufficient, and advanced to the next host in the country on its own.

This association was founded on the initiative of the Ministry of Industry at that time Mr. Hasbi, IMATAP Director, Mr. Rudy, President Director of PT BKI and several IKM entrepreneurs including Kosasih, Eki Komaruddin, Baharuddin, Januar Pribadi, Yunus, Jatmiko, and Zakky.

The Purpose of Establishing PIKKI

- ❖ Compile the component manufacturer ship domestically during this struggle singly, to unite and jointly promote efforts, improve quality and production capacity so that it can achieve optimal profit.
- ❖ Obtaining the optimal business results expected to be through cooperation and unity of the members in each of the work done. Cooperation and unity is implemented in the form of mutual aid since the existence of an order or request a product until the delivery of the product to the buyer and customer.
- ❖ Collaboration that is mutually supportive and supportive is stated in the PIKKI work program which is arranged together based on the principle of kinship, sense of belonging and affinity, advanced principle and mutual benefit, and a high spirit of nationalism or the spirit of **"Red and White" and Garuda on my chest Thus"**, through the PIKKI organization, producers who are members of PIKKI are expected to benefit larger or that it should be acquired for entrepreneurs than if attempted in singly.
- ❖ One of the purposes of PIKKI is producing a national Ship Components of good quality and is certified in both markets to BKI abroad with competitive price. PIKKI stand in December 2014 and incorporated the law based on the deed of Establishment No. 59 11 November 2015 by Notary James Sinaga, SH, M.Kn

PIKKI is confirmed as legal entities on the basis of a decision of the Minister of Justice and human rights the number AHU-0028551. Ah. 01.07 Year 2015 About an endorsement of the establishment of Indonesian Ship Component Industry Association (PIKKI).

As the information that the industry components ship in Indonesia:

- ❖ Has the average number of employees between 30 to 300 people, consisting of Managerial 10%-15% of the total employees, and the rest is the operator/production.
- ❖ Able to do good production activities are mass or mass production and mass production.
- ❖ Having production machines and supporting manufacturing and production scale fabric which average these machines in the production of the countries Japan and China
- ❖ Most industrial locations are in Java, 10% are large industries, and 90% are small and medium industries with a working capital capacity of less than 2 billion rupiah.

Eki Komaruddin
Chairman of PIKKI

Roadmap

- 2015** : Able to make deck equipment, anchors, window, doors, and interior, have the facility to meet the 30% needs component ships domestically, as well as empower PIKKI.
- 2020** : Able to make various types of valves, steering gear system, sewage / water treatment, have facilities to meet 40% of domestic vessel components, and PIKKI have the ability to design and engineer the special equipment.
- 2025** : Able to make various types of ship propulsion and navigation, have facilities to meet 50% of the needs of domestic ship components, PIKKI has the ability to design special equipment such as LNG / LPG vessels and naval vessels, and has a sufficient ship component industry
- 2030** : Able to build various types of ship engines, having facilities to meet 60% of the needs of domestic ship components, PIKKI is a centre of superior ship component design and engineering, and has a strong ship component industry.

Organization

Member of the Advisory Board:

1. Putu July Ardika, MA-IMATAP, Director of The Ministry Of Industry
2. Budhiarto Sulaiman – IPERINDO

Member of the Supervisory Board :

1. M. Kosasih
2. Setiyadi S. Setjopranoto

The Secretariat of the PIKKI :

- | | |
|-------------------|----------------------------|
| Chairman | : Eki Komaruddin |
| The Chairman | : Abdi Wesly |
| Secretary General | : Drs. Baharuddin Abubakar |
| Secretary I | : Zakky Hidayat |
| Treasurer | : Jatmiko |

Heads Fields

Chairman Of The Organization and membership : Yunus

Chairman of product development, competence, and standardization : Januar Pribadi

PIKKI Regional Industry Coordinator (KPD)

- KPD Sumatra and Batam : Maryati Bangun
- KPD Jakarta : Suwarno
- KPD West Java : Adi Liman S
- KPD Surabaya : I Made Suwarta

Activities

A. The Program Import Duties Borne By Government (BMDTP).

This program is a form of caring the Government through the Ministry of industry to develop and advance small and medium industry (IKM) in the form of a government program to bear import duty upon the importation of goods or raw materials for the purposes of manufacture of ship components made by IKM in the country.

B. Program Guidance Techniques

This program is a program of cooperation with the Government through the Ministry of industry in order to make improvements in the components of the industrial process to improve the quality and also to make new products at once towards Independent IKM program with the proper achievement of the target processes, appropriate quality, and appropriate pricing

C. The Program TKDN

This program is a program of cooperation with the Government to increase the level of local content in order to protect growth in the contribution of the use of domestic components.

D. HUMAN RESOURCE Cooperation Programs

Collaboration on the job training labor or HUMAN RESOURCES or in the company of PIKKI member workshop in foreign countries in order to transfer the science or the transfer of knowhow in particular knowledge or modern technology of production process components the ship.

E. Promotion

Involve members in national and international exhibitions.
